Serving Financial Services – The world's most demanding industry

The global financial services industry, comprising banking, foreign exchange, investment services, insurance, private equity and venture capital firms, constitutes the largest group of companies in the world in terms of earnings and equity market cap. In today's fast-paced and intensely competitive markets, the success of financial services companies hinges on the speed and reliability of transactions – a function of the underlying network.

Introducing low-latency transatlantic connectivity for global financial leaders

To meet the needs of the world's vital financial institutions, AboveNet has launched a new Gigabit Ethernet service between New York and London, providing one of the industry's fastest end-to-end transatlantic connections for demanding critical low latency applications including foreign exchange trading and market data feeds.

Whether to support the extreme low-latency required for algorithmic trading, the secure completion of financial and banking transactions, or the physically diverse network connections that provide critical disaster recovery paths, AboveNet's high bandwidth connectivity solutions set the industry standard for speed and security. As the recognised leader in meeting the stringent network requirements of financial services companies, AboveNet is extending our capabilities with this new transatlantic service.

Breadth of Metro Reach in New York and London Financial Districts

AboveNet's low-latency transatlantic service reaches key financial locations in:

- London: Slough, The City and Docklands
- New York Metro: Manhattan and New Jersey, including: Newark, Weehawken, Secaucus, Carteret, and Clifton

Features and Benefits

- One of the Lowest latency routes between New York and London
- GigE Unprotected Circuit
- Select Agility Latency Guarantee (POP-POP): 66.95ms
- Tailored Latency (End to End) SLAs available
- Sub-1ms round-trip Metro access to hundreds of buildings in the New York and London metro markets.
- High bandwidth connectivity from London to major U.S. metro markets

Service Guaranteed by Industry's Best SLAs

AboveNet's new Low-Latency Transatlantic Service is backed by AboveNet's Agility Guarantee program, one of the industry's most respected SLAs. Guarantees are provided by combining one of the shortest transatlantic routes with the most direct terrestrial backhaul links into New York and Slough.
